Infections in Rural and Remote Australia

Inviting rural clinicians: GPs, pharmacists and nurses

This workshop will encourage participants to engage in case based discussion regarding contemporary practice update of Infections in Rural and Remote Australia delivered by experts in Australian community-acquired infection. Limited to 50 participants with a preference for Rural Health Clinicians from Queensland.

Topics:

Skin and soft tissue infections

Respiratory infections

Severe sepsis

Getting the most out of your microbiology lab

Management of multi-resistant organism infections
such as MRSA and VRE

The weird and wonderful ~ rare Australian community
acquired infections

Presenters:

Presenters include distinguished infectious diseases physicians, microbiologists and rural and remote physicians from around Australia with decades of experience managing real-world patients in the bush

Workshop Coordinators:

Dr Krispin Hajkowicz (Infectious diseases physician)

Dr Minyon Avent (AMS Pharmacist)
