

## Genevieve Dally

Genevieve Dally is a decade long champion of the sexual and reproductive health sector. Cutting her teeth in a busy urban general practice, Genevieve developed a nurse-led sexual health clinic to address gaps in access to services for young people. Recognising early on the limitations of a diversified workforce Genevieve then moved into sexual and reproductive health education to strengthen the skill base and build the capacity of doctors, nurses and allied health professionals. Genevieve is a registered nurse with a Masters in Public Health and is currently employed by Family Planning and Welfare NT in the role of Manger for Education and Workforce Development. Genevieve is passionate about sexual rights being human rights and works tirelessly to promote safe, happy healthy and enjoyable sexual lives for all people.
